

Junction Creek
Stewardship Committee
Comité d'intendance
du ruisseau Junction

The Junction Creek Stewardship Committee is a grassroots not-for-profit group dedicated to the restoration of Greater Sudbury's central urban waterway, known as Junction Creek. Since 1999, the stewardship committee has been leading stream monitoring projects, environmental restoration activities, and educational programs to address ecosystem impairments caused by historic logging and mining, acidification, metal deposits, and ongoing urban pressures. Community collaboration and stewardship are promoted in all aspects of the committee's work to help raise awareness and appreciation for the long-term health and conservation of the watershed.

WHAT WILL IT COST ME?

Site visits are available if you are looking for some advice (within our delivery area). Our Shoreline Re-Naturalization Starter Kits are offered at a discounted price to a limited number of participants based on funding support for the area.

If you want more than the 50 plants, no problem, we simply add them to your planting plan at cost and take care of all the ordering for pickup.

If you want us to carry out all the work from start to finish, then we can do that too at a subsidized rate! We charge \$3.00 per plant for planting plus mileage.

DOES YOUR PROPERTY HAVE A NATURAL EDGE?

Shorelines are one of the richest environments on earth, but they are also among the most threatened. Habitat loss and degradation, water quality impairments, and increasing pressures from shoreline development can deteriorate our lakes and rivers, making them a priority for environmental stewardship and restoration.

Shorelines are the ribbon of life, providing habitat, including shelter and food, for over 90% of aquatic wildlife.

HOW CAN YOU GET INVOLVED?

Free site visits are available to waterfront property owners in our delivery region.

During these visits, we will provide you with advice and recommendations to improve the health of your shoreline property.

If planting is recommended and you decide to move forward with a shoreline re-naturalization project, we can offer you all the resources you need to get started through the generous support of our funding sponsors. Resources in our Shoreline Re-naturalization Starter Kit include a customized planting plan, educational materials and native plants to create natural habitat along your shoreline.

Shoreline Re-Naturalization Starter Kit Includes:

- Free site visit
- Customized re-naturalization planting plan for your shoreline property
- 50 native plants including 35 bare root (small) and 10 potted (large) plants and 5 wildflowers
- 45 Coconut fibre pads to deter grass from growing around new plantings
- Tree guards for all deciduous trees
- Mulch for your wildflowers
- Plant Care Guide with instructions on how to take care of your new plants
- Habitat Creation Guide
- Wildflower Garden Guide

ABOUT THE PLANTING PLAN

Our planting plans are created onsite with you and provide detailed information and plans to re-naturalize your shoreline property. We take photos of areas for planting and overlay native plants that are well suited to your property based on site conditions such as soil type and sunlight availability.

We will work with you to create a plan that works for you including options for low growing plants in areas where views are important.

Restoring the
Ribbon of Life
