

Junction Creek Stewardship Committee Youth Council

EMPOWERING YOUTH FOR A STRONGER COMMUNITY

RENEW

Reintroducing wildlife, including brook trout, tree planting, invasive species removal and litter clean-ups are actions that encourage a healthy biodiversity to maintain balance and support life.

RESPECT

Junction Creek, like all of nature deserves our respect. Vital to the city's health and our own well being, a healthy creek provides a natural waterway that supports life and promotes 'community' by connecting us all.

RESPONSIBILITY

If not you, then who? We all must play a role in protecting the creek and the many plants and animals that make it their home. Keep your creek and community clean by disposing trash properly and lend a hand by volunteering.
