## Activity 2.2: Watersheds & Pollutants

In a watershed, you can see many examples of litter, in a lot of different places. The types of litter we find can give us clues about where they came from and how they got there!

**How do you think pollutants enter waterways such as Junction Creek?**

**What are some common types of litter you think can be found in a watershed?**

*Junction Creek

*Comité d'intendance  
du ruisseau Junction*

**REFLECTION: What are some other litter items you may find in Sudbury and where might they have come from?**

**REFLECTION: What are YOUR most common sources of litter and how can you reduce them?**
